

## ASBESTOS CONSULTING SERVICES

G2 Consulting Group, LLC was retained by Anderson, Eckstein, and Westrick, Inc. (AEW) to perform a limited asbestos survey within the City of Harper Woods Municipal Building. The survey was limited a section of the building which was scheduled for renovation activities. An on-site survey was performed within the proposed renovation area of the building to identify, locate, and quantify interior friable and non-friable building materials suspected of containing asbestos in accordance with applicable regulations.

Upon identifying asbestos containing building materials within the designated work area, G2 coordinated asbestos removal (abatement) activities. G2 Consulting Group, LLC recommended a licensed asbestos abatement contractor to perform the proper removal. G2 Consulting Group, LLC provided asbestos abatement consulting services included air monitoring and project management.

A review of contractor's training certificates, transportation, final disposal receipts, contractor's notifications and other pertinent documents required by Federal and State authorities was conducted. Abatement practices were reviewed and monitored prior and during abatement activities. To insure the safety of the public, building occupants, and the abatement workers, air

sampling and analysis was performed. The air monitoring was performed before, during, and after the abatement work. Post abatement visual inspections and final air clearance sampling were also performed to verify the complete and proper removal of asbestos containing building materials within the area of abatement.
