G2 CONSULTING GROUP WINS GENESSEE COUNTY SEWER JOB

Troy, Mich./May 17, 2007 – G2 Consulting Group, a Troy, Mich.–based engineering firm, has been retained as the geotechnical engineer for a major sanitary sewer extension project in Genessee County, Mich.

The Northeast Extension Sewer Project No. 3C involves installation of approximately 10,500 lineal feet of new 54–inch diameter gravity sewer lines from near the intersection of Potter and Genessee roads to the intersection of Vassar and Davison roads to improve the hydraulics of the current system. Part of the sewer will be installed using “open cut” excavation – basically in a deep trench dug from the surface, says Mark Smolinski, G2 founding principal. The rest will be installed in underground tunnels.

G2 will provide geotechnical design services for tunnel liners and for tunnel shafts used to launch and retrieve tunnel digging and sewer installation equipment. G2 will also conduct excavation stability evaluations, groundwater evaluation services and geotechnical instrumentation to monitor earth movements during the construction process.

-- more --

D'Alessandro Contracting Group of Detroit is the project's general contractor and selected G2 as the geotechnical engineer.

G2 (www.g2consultinggroup.com) is a full-service engineering firm providing geotechnical, environmental and construction engineering services to Fortune 500 companies, major utilities, property owners, government agencies and leading architectural, engineering and construction firms across the United States. Based in Tro., G2 also has offices in Brighton, Mich., and suburban Chicago, Ill.
