

G2 Completes Third Record Year; Anticipates Strong 2015

TROY, MI, February 9, 2015 - G2 Consulting, a nationally recognized leader in geotechnical, environmental and construction engineering services, said today that the company completed a record 2,700 projects in 2014 leading the firm to its third consecutive record year of revenue growth. Revenues for the company grew by 50% in 2014 following growth of 31% in 2012 and 20% in 2013.

“Like others in our industry, we stayed focused and struggled through the economic downturn of 2008-2011, but we were able to hold onto all of our people during the recession and put them to work improving our services and processes. That work is paying dividends for us now,” says G2 President Mark Smolinski. “The continued growth of our telecom business and the long lack of attention to Michigan’s roads and highways that’s finally now being addressed have put our services in greater demand than ever.”

Smolinski said that G2 has a backlog of private and public jobs in the pipeline that should make 2015 an even better year. “Pent-up demand for new development and deferred maintenance from the economic downturn are putting real pressure on companies like ours to produce,” he said. “This is a good thing and we’re ready for it.”

G2 has completed projects in infrastructure, health care, telecommunications, alternative energy, waste water and educational facilities. The company is currently involved with or has recently concluded projects for the M1 railway, I-96 reconstruction in Wayne County, MI, the I-94 / Sargent Road interchange in Jackson County, MI., reconstruction of the I-75 & University Drive interchange, First Solar projects in Texas and Colorado, and major health care projects in Rochester, MI., and in Seattle, WA to name just a few. G2 is licensed to work in 36 states.

In December, G2 was awarded a three year “as needed” services contract by the Michigan Department of Transportation which will give the company an opportunity to contribute to MDOT jobs throughout the state.

“We believe 2015 will be a big year for the construction services industry nationally,” said Smolinski. “It will be a real test for our ‘Smart. Results. Fast’ philosophy at G2 but we’re absolutely confident we’re up to the challenges and we look forward to taking them on.”
