

## **G2 Consulting Group Opens Office in Ann Arbor**

**Ann Arbor, MI, Feb. 13, 2014** -- G2 Consulting Group, a nationally recognized Michigan-based engineering services firm specializing in geotechnical, environmental and construction engineering services, announced today that it has opened a new full service office in Ann Arbor to work with clients in Ann Arbor, Washtenaw County and the surrounding area.

G2 has completed several campus improvement and infrastructure projects at the University of Michigan with its Architecture, Engineering and Construction Group (AEC). G2 also recently completed its work on the Arbor Hills shopping center, and is providing special inspection / testing services to general contractor Neal Construction for Dexter Fasteners.

"G2 has been fortunate to have contributed to the growth and construction activity in Washtenaw County and particularly in Ann Arbor in recent years," said G2 President Mark Smolinski, P.E., "and we know we can serve our clients even better by locating closer to them. Having an Ann Arbor office will enable us to participate more fully in this community."

The Ann Arbor office will be managed by 12 year G2 veteran Jason Stoops, P.E., who completed both his undergraduate civil and environmental engineering degrees as well as his masters in geotechnical engineering at the University of Michigan. The office opens with four full time engineers and a senior field technician and will include a full service materials laboratory that can complete soil and materials lab work onsite saving clients both time and money.

"I've been working to get back to Ann Arbor since I left in 2001," said Stoops. "We look forward to helping G2 earn an even bigger role in the exciting development activities at the University and in the broader business community."

G2 has recently experienced strong growth and is expecting to report an approximate 20% improvement in its 2013 revenues. The Company sees significant near-term infrastructure investments in Michigan and is eager to more closely align with key regional markets.

The new office will be housed in the Eisenhower Commerce Center at 1595 Eisenhower Place, Ann Arbor. An open house is planned for late in the first quarter, 2014 with details to come.
