

G2 CONSULTING GROUP'S THIRD YEAR IN ANN ARBOR BRINGS NEW OFFICE, NEW HIRES AND NEW PROJECTS

Three years after opening its Ann Arbor office, G2 Consulting Group has completed work on more than 150 public and private geotechnical projects, quadrupled its employee count and is nearly tripling its office space including expanding its full service laboratory that will enable the company to compete for an even broader range of work in the future.

The geotechnical, environmental and construction engineering services firm currently has 13 employees in Ann Arbor and is interviewing now to fill at least four more positions. The company is moving from its current 2,700-square-foot office to 7,900 square feet at 1350 Eisenhower Place.

In the past four years, G2 Consulting has completed infrastructure projects in Ann Arbor, Ypsilanti, Saline, Dexter, Northville and Brighton with dozens of additional projects in the cue. The company has also completed geotechnical engineering for housing projects for University of Michigan students and for First Solar, an Arizona-headquartered solar energy company with projects across the country.

The additional laboratory space in G2's new Ann Arbor office will conform to national and international AASHTO (American Society of State Highway and Transportation Officials) standards and qualify the company to provide its clients expert advice and feedback on laboratory

best practices in highway and transportation construction procedures and techniques.

G2's Ann Arbor office adheres to accreditation requirements for testing agencies engaged in soil, rock, construction materials and bituminous concrete. Standards adhered to by G2's construction and testing inspection services group include AASHTO R18, ASTM D3740, ASTM C1077, and ASTM E329. The company's rigorous in-house training program and accreditation through agencies such as AASHTO qualify the office to provide expertise and sensible solutions to the inevitable challenges construction projects bring.

G2 is currently seeking qualified candidates for environmental and geotechnical project management and is looking for two additional engineering technicians to join their growing team.

CLARK CONSTRUCTION RECOGNIZED AS FIRST IN THE NATION IN SAFETY BY ASSOCIATED GENERAL CONTRACTORS OF AMERICA

Lansing-based Clark Construction Company's long-standing reputation as the national leader in construction safety was solidified this week as the Associated General Contractors of America (AGC) named Clark as the First Place winner of its prestigious AGC Construction Safety Excellence award (CSEA). Clark was recognized in the 150,000 to 350,000 work hours category. The award was presented at the AGC National Convention in Las Vegas.

"We have prided ourselves on being Michigan's safest contractor and the prestigious AGC CSE award bears that out," said Clark Construction CEO,

Charles Clark. "This is a great tribute to an entire team of folks at Clark that put taking care of one another first and make the decision every day to be safe."

The AGC CSAE award recognizes those construction companies who excel at safety and health performance. This program closely examines each candidate's commitment to safety and occupational health management and risk control. AGC's CSEA selection process is considerably comprehensive. Judges look for evidence of company management commitment, active employee participation, safety training, work site hazard identification and control, and safety program innovation.

Clark Construction has won virtually every major state and national safety award in the past 15 years. Clark recently completed 4 million hours on the job without lost time due to injury. Since January 2000 when the historic streak began, Clark Construction has averaged approximately 250,000 work hours per year and completed more than \$3.2 billion in construction projects.

MICHIGAN'S TOP ENGINEERING AND SURVEYING PROJECTS RECOGNIZED AT ANNUAL ACEC/M EXCELLENCE AWARDS CEREMONY

The American Council of Engineering Companies of Michigan (ACEC/M) recently honored firms for engineering and surveying excellence during the association's annual Engineering and Surveying Excellence Awards ceremony. On March 11, 2017 design professionals and guests gathered at The Fillmore Detroit to recognize outstanding Michigan engineering and surveying projects from
